NB Surveys Offices 
NB Surveys Project Locations 

NB Surveys Global are world leaders in delivering proven, cost saving, value added, engineering design support and visual asset database services across a wide range of industrial applications. We value our reputation as one of the most experienced, professional and innovative survey companies operating globally.

NB Surveys Global competitive strength lies in its ability to provide rapid mobilisation of experienced personnel and state of the art equipment in support of projects both on and offshore from our

dedicated office facilities strategically located in Aberdeen, Abu Dhabi, Dubai, Doha, Dammam, Doha, Bangkok, Kuala Belait, Miri, Mumbai, and Singapore.

A combination of the technical expertise of our personnel, the latest state-of-the-art technology, bespoke proprietary software and procedures enables us to adapt these capabilities to deliver precise measurement solutions for a wide range of applications both on and offshore worldwide.

Precise Measurement Surveys – 1mm for green and brownfield

N.B. Surveys Global uses advanced survey equipment combined with proprietary software to facilitate measurements to an accuracy of 1mm or better. Three dimensional CAD models are created by direct measurement to critical plant items such as flange tie-in points, support locations and route corridor models. Effective on fast track jobs, fixed or moving plant environments with instantaneous high accuracy results available. Highly mobile, the system allows measurement to be taken in the most confined and awkward places without loss of accuracy.

Successful installation of the pipe work is achieved by carrying out as-built surveys of every spools before shipping to site. This ensures each spool is built to the required dimensional tolerance and will fit first time. Our Company has a 99.9% success record for this service.

TP Number	NBS Flange ID	E	N	EL	RF Diameter	Flange Type	Flange Angle - N edge	Flange Angle - E edge	Flange Angle - Top edge

Precision Measurement Surveys – 0.01mm for machine tolerances

Ideal for measuring medium to large parts and providing an ultra-portable solution for large-scale inspection and assembly applications, industrial laser trackers have become an essential piece of metrology equipment in all kinds of industries. Laser trackers offer accurate 3D measurement to reflectors, from surface inspections in the automotive body shop to large-volume measurements in energy industry installations, or metrology-guided automated aircraft assembly systems, the speed, accuracy and portability of laser tracker technology delivers data, when and where it is needed.

Static Industrial Laser Scanning – onshore and offshore

N.B. Surveys Global have one of the largest fleets of laser scanners in the world. We own and operate over 50 Z+F laser scanning systems. Rapid laser scanning is the most advanced technology for data capture and measurement. It rapidly collects millions of real world 3D coordinates points to support preparation of either a point cloud, CAD plant model, or 360 degree wrap around panoramic views. The raw point cloud data can be input into existing CAD packages for clash testing of new design concepts against the real world plant. These systems collect data at such a fine resolution that photographic quality images can be produced from the three dimensional data collected to an accuracy of between 0 – 5mm. The scanner will capture data at distances up to 180 meters in either grey scale or full colour.

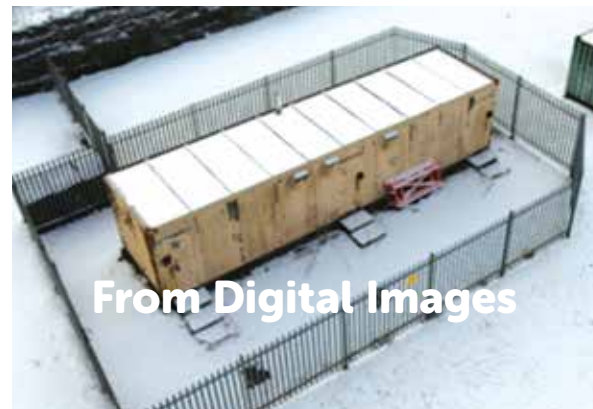

Mobile Industrial Scanning – onshore and offshore

Utilising advanced software systems NB Surveys can capture accurate survey data to supplement terrestrial captured scan data from both drones and boats. The systems NB Survey deploys are not just for image capture but are used to create point cloud models for further modelling and data analysis.

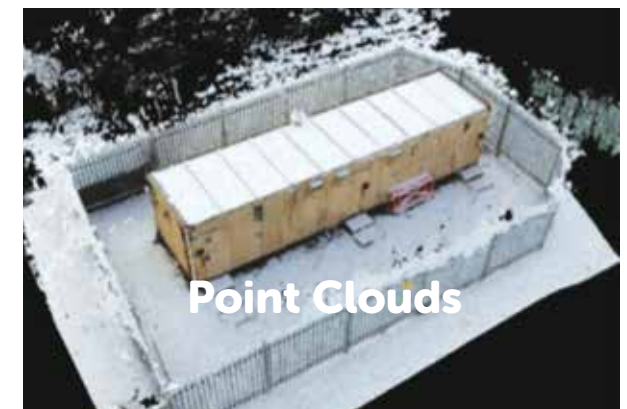

This technique allows remote and inaccessible areas to be as-built without the need for scaffold access. The accuracy of the data will depend on the distance from the object the drone captured the data, but accuracies of around 1-2 cm's can be expected.

Fast as-build data collection and confirmation can be facilitated by the systems.

From Digital Images

to

Point Clouds

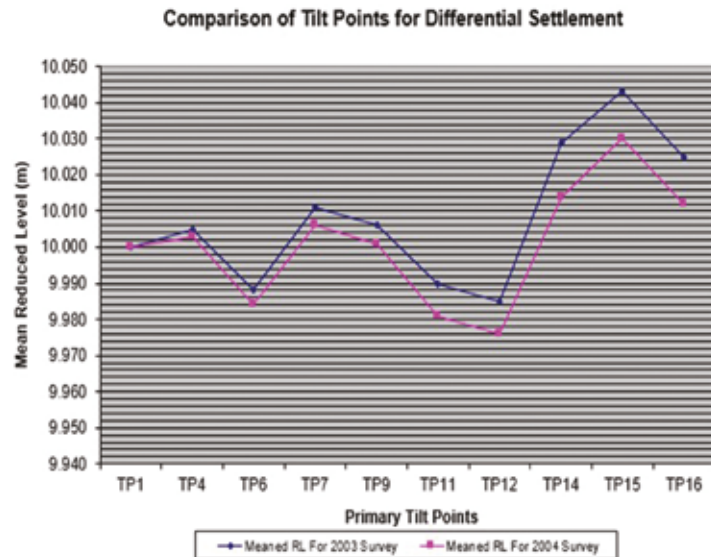

Tilt and Settlement Monitoring – structures

As part of insurance compliance requirements, and to ensure the structural integrity of offshore platforms and drilling derricks, tilt settlement and vertical alignment surveys are required on a recurring basis.

This is particularly important when considering the air gap between the lower platforms decks and the wave crest heights in adverse sea conditions.

N.B. Surveys have been carrying out this services for multiple Operators for over 20 years and on over 100 facilities worldwide.

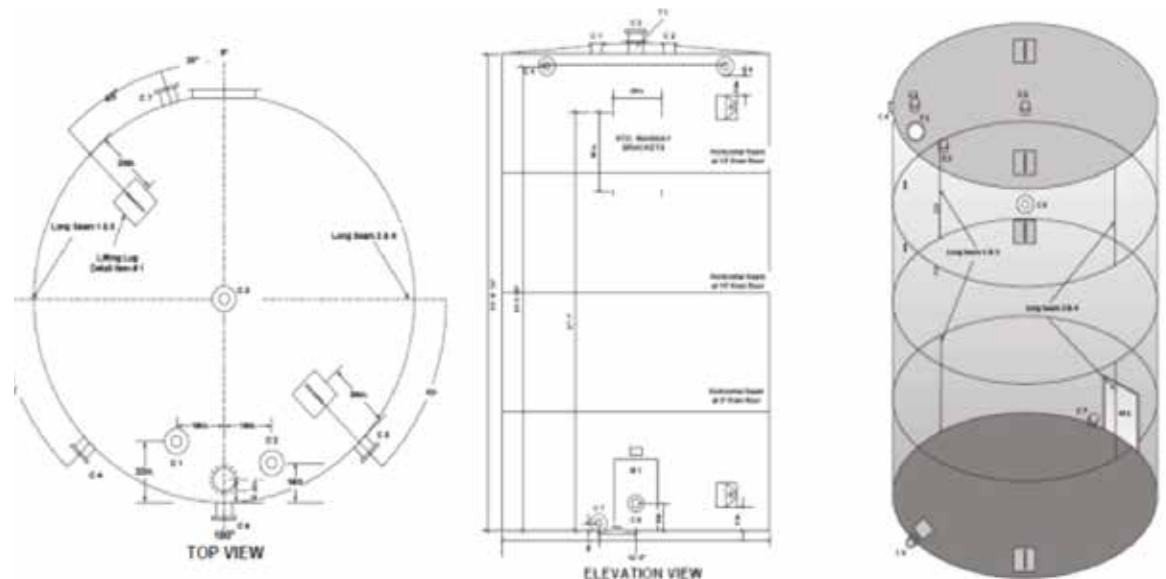

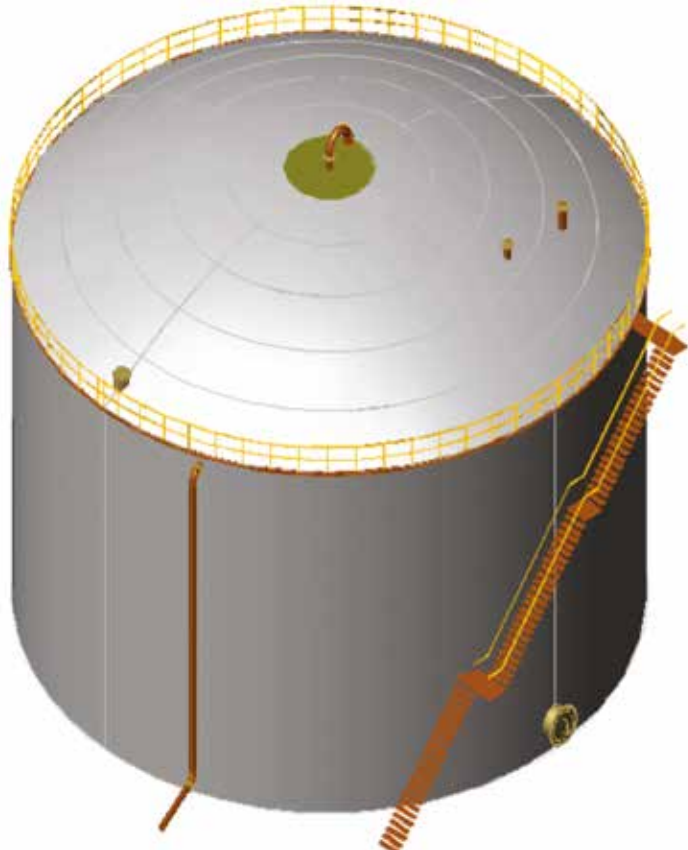

Utilising state of the art GPS receivers, and high order post processing software, very accurate platform heights can be determined over long base lengths. Coupled with tilt determination, NB Surveys can provide long term monitoring and settlement analysis reports.

Tilt and Settlement Monitoring – tanks

Laser scanner are used to collect all the data required in full "picture quality" detail for :-

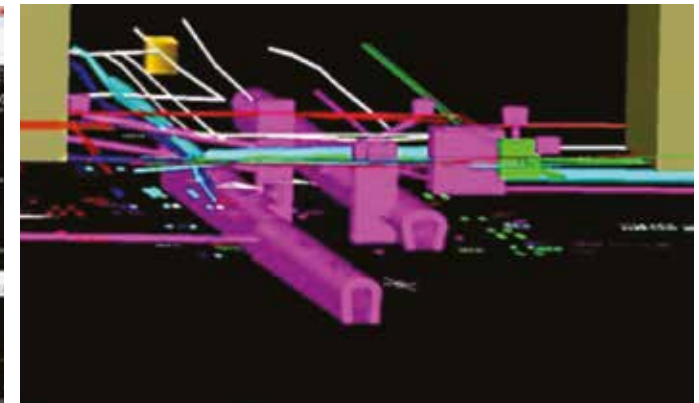

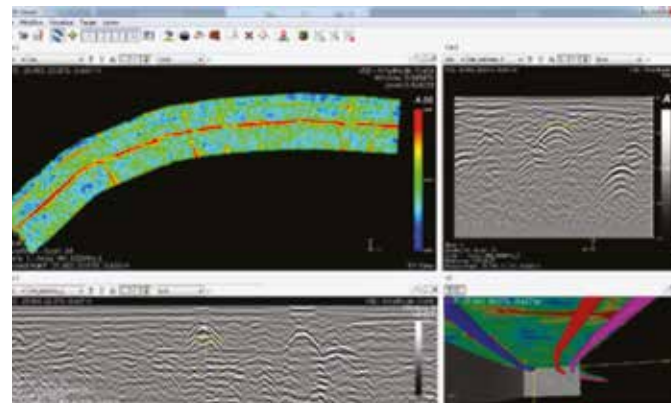

Calibration and volume determination, redesign / modification, safety planning / visualization inspections, identify areas for repair, deformation analysis, containment dike analysis

Underground Scanning

Increasingly Clients have requested that as-built underground assets be collected at the same time as laser scanning the above ground assets. To meet client demand NB Surveys Global has invested in the very latest dual frequency ground penetrating radar systems and can offer complete asset collection.

NB Surveys Global operates the very latest dual frequency multi antenna systems which can cover up to 14000 square meters per day. GPR can locate metallic and non-metallic pipes, foundations, reinforcements, sewers cables, and ducts and defines position and depth in a single pass. GPR can locate underground services for inclusion in drawings or 3D CAD and provides cost saving from plant strike avoidance, rework, and eliminate trenching.

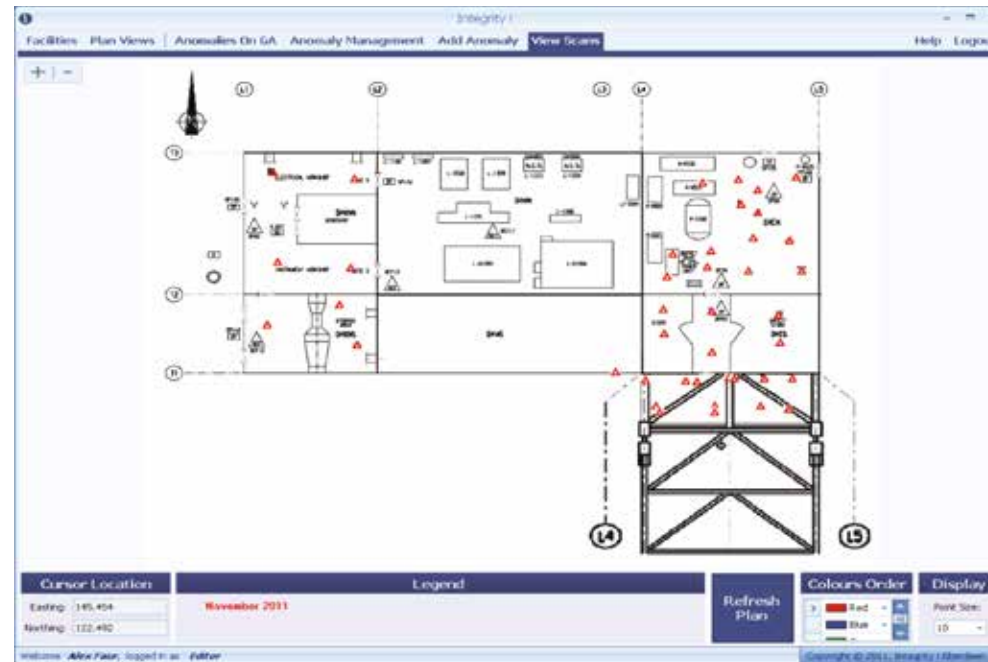

360 Degree Photographic Database

Integrity i is a data management system designed specifically for the management of asset integrity anomalies. Based on 30 years of industrial experience, the system has been developed by NB Surveys using state of the art graphical interfaces, laser scan data, and 3D files working with a database to manage, organise and present digital records of anomalies within industrial plant.

This system gives the plant operator a simple to use method of recording, managing and archiving anomalies within their plants. This facilitates and improves planning and targeted campaigns to rectify the anomalies. By reducing exposure to risk, the HSE safety case is improved. It also proves, to legislative authorities, that the operator has proper controls in place to manage anomalies within their plant and provides a central repository of all data and documents related to the individual anomalies.

It can be used by all levels within an organisation - from senior management for reviews and strategic planning, engineers for analysis and investigation, designers to extract the construction drawings, to the work squad who will repair the anomaly on-site. It can be used to fully plan work and brief work squads WITHOUT visiting the site, thereby reducing safety risk exposure and cost.

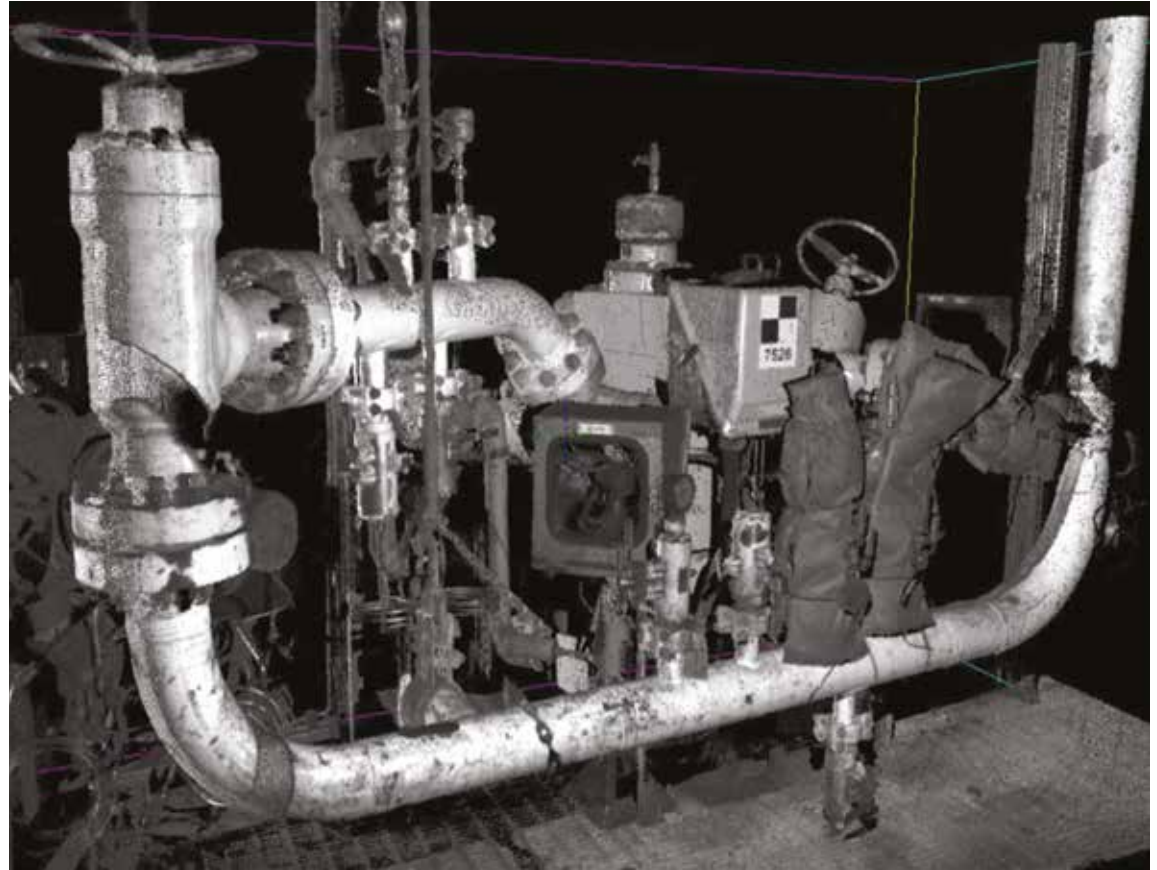

Benefits include:

- Improved HSE compliance
- Real time anomaly monitoring
- Full integration with existing asset management systems
- Visual anomaly Management reports
- Reduces the need for site visits
- Reduces personnel exposure
- Provides accurate dimensional data for design use without site visit
- Provides real time management reports on defects and repair issues
- A central location for anomaly and asset data
- Controls defects and repair work pack generation
- An application that links to laser scan data
- Planning and virtual reality immersive visualization at all discipline levels

3D Point Cloud Database

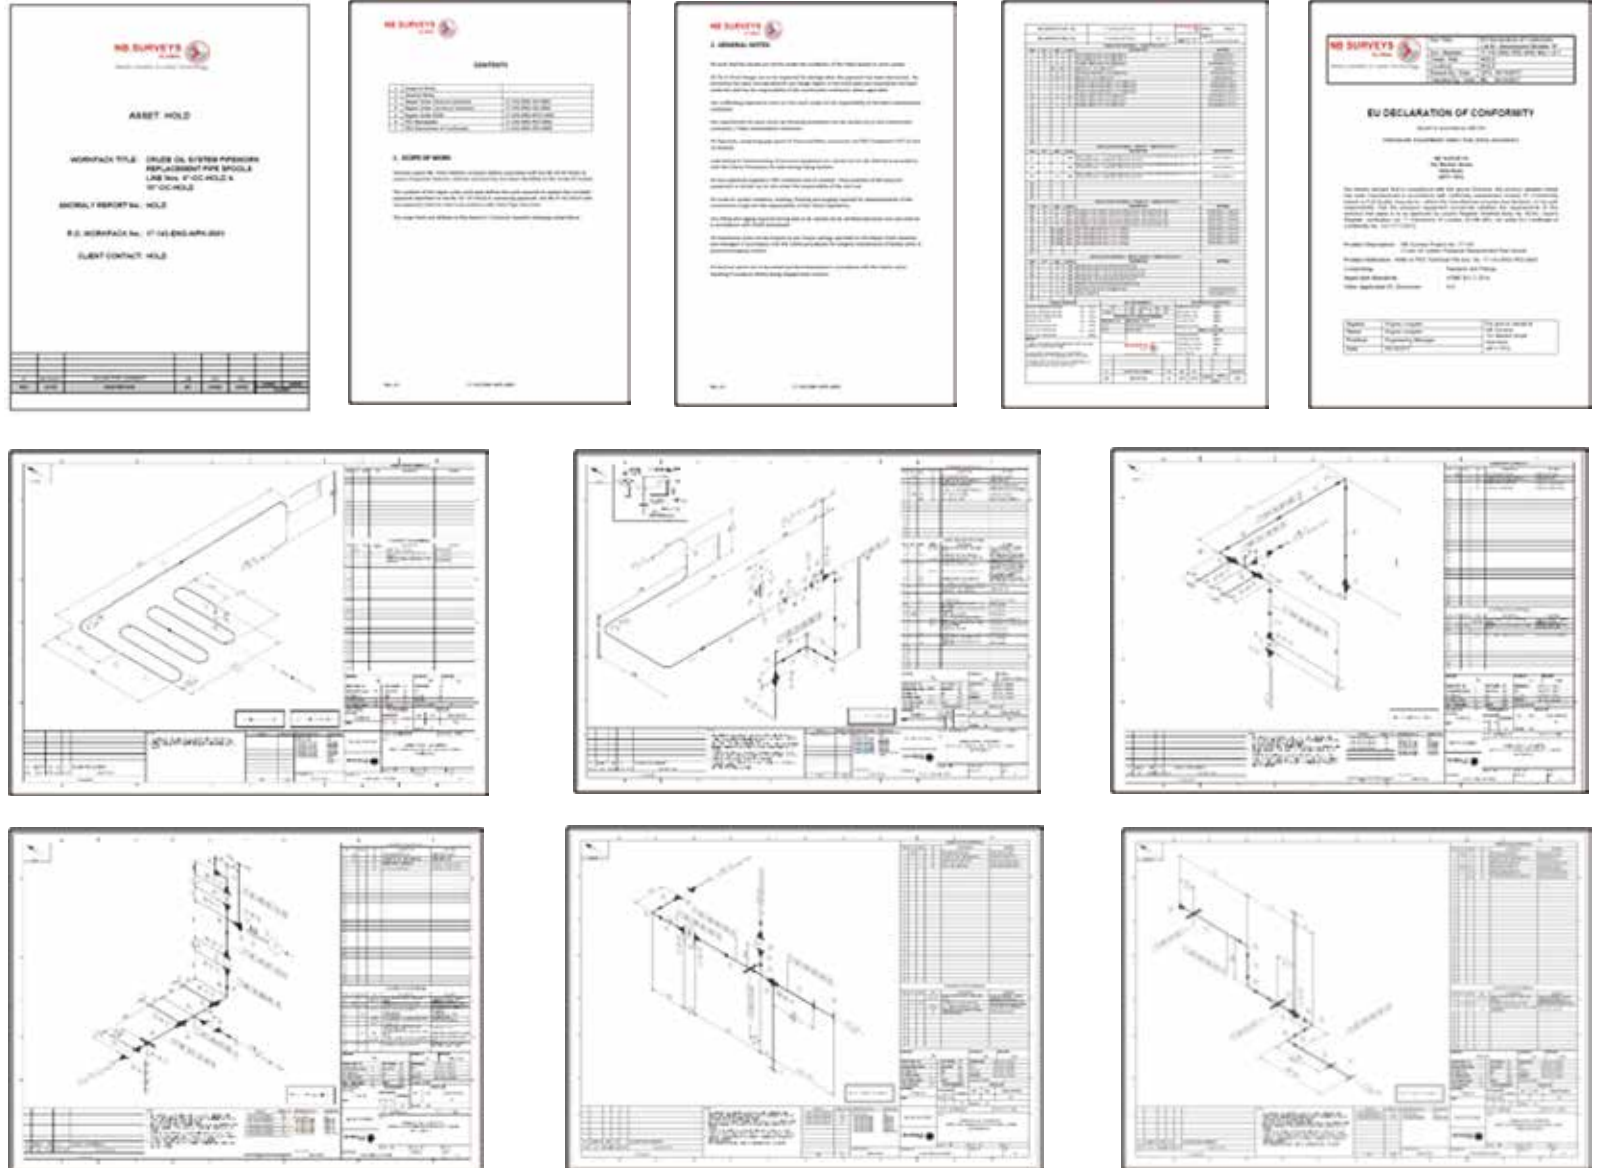

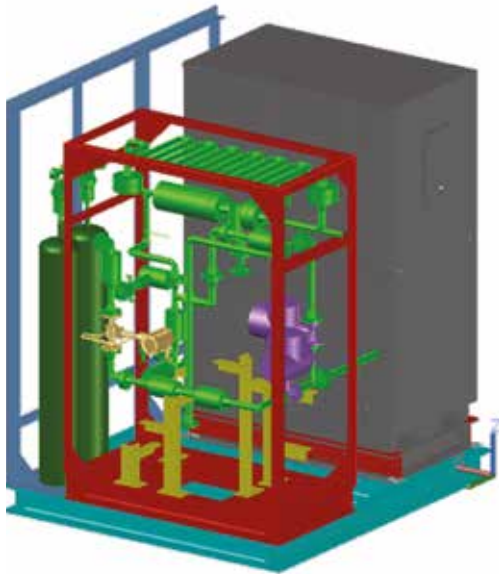

3D Point Cloud Databases are available immediately after the completion of the site survey. They provide a rich, detailed, accurate as-built database from which to start projects. The data can be brought into a 3D CAD environment for utilisation alongside CAD designed systems to check dimension or clashes. Available in either grey scale or standalone full colour visual databases, if required.

Engineering Drawings

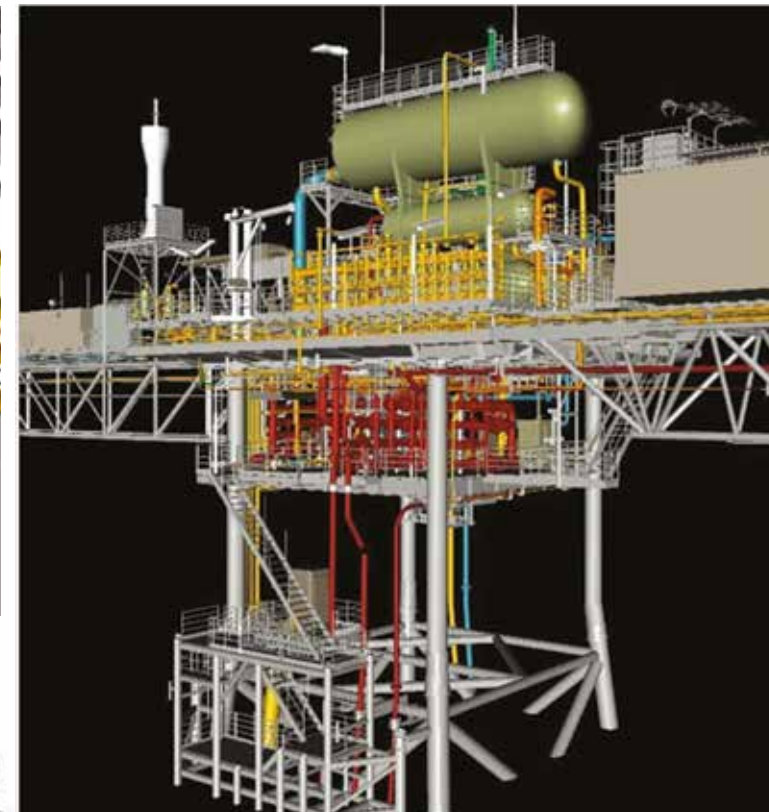

Production of engineering drawings and work packs is generally undertaken from the point cloud models without any return to site visit. Reducing the cost, time and risk involved.

The service can be extended to produce full engineering documentation packages including P&ID's, Instrumentation, Structural, Piping, Electrical, Mechanical, Fire and Safety drawings.

3D CAD Modelling

With our worldwide network of strategic partners, we are able to provide low cost 3D CAD modelling in AUTOCAD, Microstation, PDS and PDMS. For the ultimate in low cost utilisation, the data can simply be supplied as point cloud models, or as free to use "Truview" images.

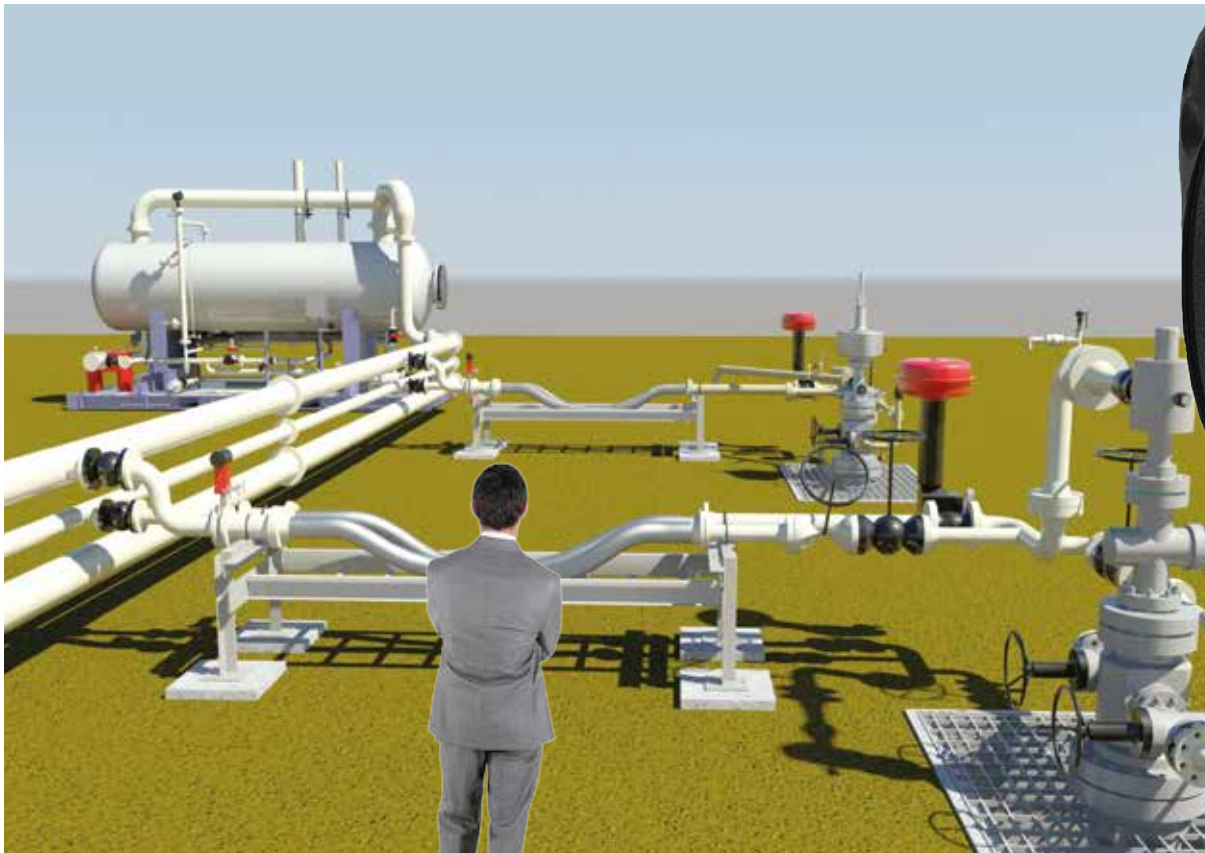

Virtual Reality

NB Surveys virtual reality system will bring you to the worksite. The use of VR headsets and software systems, integrated with our 3D laser scanning and 3D modelling services allow NB Surveys to create the very latest in visual asset management tailor made for your facilities.

Our bespoke software development approach allows customers to tailor make the VR world to meet their engineering and training requirements.

The VR world NB Surveys create is interactive and responsive allowing valuable system analysis and off site training.

This is a fully immersive VR solution which will dramatically improve asset management, project analysis and learning retention of information and events.

Benefits

- Fully immersive asset planning
- Reduced site visits and costs
- Inter-continental project collaboration
- Extraction & installation analysis
- Safety & operational training
- Design review

Lean Engineering and Surveys Consultancy Service

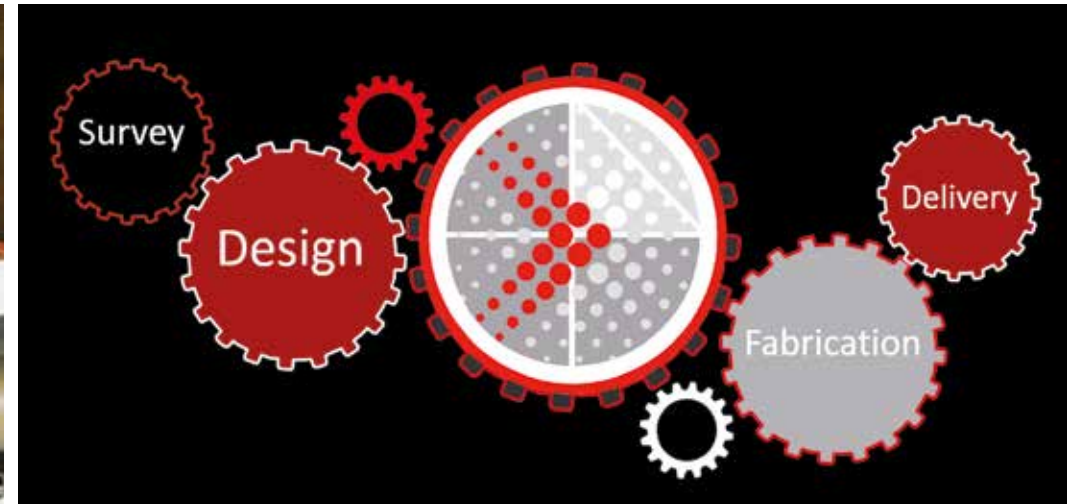

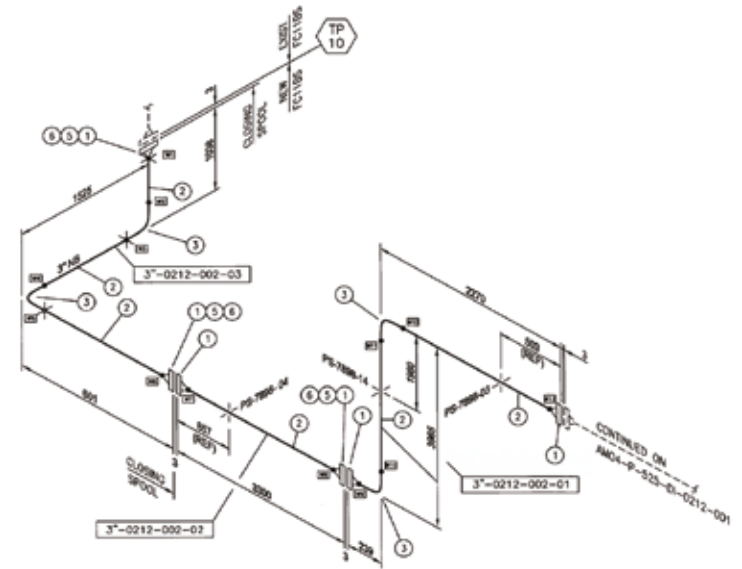

NB Surveys has become a global leader in dimensional control and laser scanning surveys since its foundation in 1982. The service line was developed in 2015 to include design and fabrication utilising our in-house design teams and in collaboration with preferred fabricators.

Today, NB Surveys delivers cost reductions to our Clients, through combined survey and lean engineering solutions, without compromising survey quality or engineering integrity from a single source supply.

NB Surveys, with the assistance of our local preferred partners, is fully equipped to supply complete, cost effective, engineering solutions to our clients through survey, design and fabrication.

Key Benefits

- Single source for survey, engineering & fabrication*
- Experienced integrated team
- High value low cost solutions
- Responsive and proactive
- Uncompromised quality and integrity
- Four decades of innovative and reliable service

Sub-section 1.2 Project / Client History

This is only a short selection of work carried out Globally over the Company history from each of the principle regional offices.

Europe

Since 1982 we have successfully carried out dimensional control, laser scanning 3D Cad modelling and digital photogrammetry surveys for the following (sample) list of clients and typical contracts.

MAJOR PROJECT LIST

Project Title	Ultimate Client/ Country	Name of Main Contractor	Work scope	Start Date	Complete Date
Offshore Topsides

Asia - Thailand

This is only a small sample of work carried out in Thailand since the initial establishment.

BMB Pig Launcher Installation	Carigali-PTTEPI	Thai Nippon Steel	Laser Scanning of BMB platform for clash check corridor routing of new Pig Launcher and associated pipework. Deliver Red Line Markups of new piping and structure.	Mar,2013	Mar,2013
Bongkot WP16 ESP Pilot Project	PTTEP, Thailand	CES	Laser Scanning of Bongkot WP16 platform for clash check corridor routing of new ESP pipework. Deliver Red Line Markups of new piping and structure.	July,2013	Sept,2013
Bongkot PP Condensate De-Bottlenecking	PTTEP, Thailand	CES	Laser Scanning of Bongkot WP16 platform for clash check corridor routing of new Condensate De-Bottlenecking pipework. Deliver Red Line Markups of new piping and structure.	July,2013	July,2013
Bongkot PP 32" Export Riser	PTTEP, Thailand	Thai Nippon Steel	Laser Scanning of Bongkot PP for Generation of lifting plan for Riser replacement project.	Jan,2013	Jan,2013
Tox-8500 Column Verticality Survey	SCG DOW Petro	DOW	Dimensional Control of existing column to check for Plumbness.	Aug,2013	Aug,2013
Zawtika ZWP03 Well Hook-Up	PTTEPI, Myanmar	PTSC Vietnam	Laser Scanning of Zawtika ZWP03 wellbay area for clash check corridor routing of new flowline pipework. Deliver Red Line Markups of new piping and structure.	June,2013	June,2013
Platong CPP1 Compressor Replacement	Chevron, Thailand	Chevron	Laser Scanning of Platong PP Booster Compressors and surrounding area for clash check corridor routing of new compressors and associated pipework. Deliver Red Line Markups of new piping and structure.	Feb,2014	Feb,2014
PG Plant as-Built Laser Scanning	SCG DOW Petro	DOW Chemicals	Laser Scanning for purposes of plant As-Built condition capture	Jan,2014	Dec,2014

Asia - Thailand (cont)

MAJOR PROJECT LIST

Project Title	Ultimate Client/ Country	Name of Main Contractor	Work scope	Start Date	Complete Date
Pipe Bridge Installation	PTT, Thailand	Tesco Engineering	Dimensional Control Survey for virtual fit up of bridge sections prior to major heavy lift.	May,2014	May,2014
Bongkot FSO2 Deisel Line Replacement	PTTEP, Thailand	LS Engineering	Laser Scanning of Bongkot FSO2 Engine room areas for clash check corridor routing of new pipework.	March,2016	April,2016
Racetrack Survey	Bangsean Racing,	AAM	Topographic GNSS Survey of racetrack routing.	Jun,2016	Jun,2016
Barge Layout and Sea Fastening Survey	Chevron, Thailand	BAGGIO LTDA	Setting Out survey of barges for Deck Grillage and Sea fastenings	Oct,2016	Oct,2016
ZOC Plant As-Built Laser Scanning	PTTEPI, Myanmar	Thai Nippon Steel	Laser Scanning for purposes of plant As-Built condition capture	Nov,2016	Nov,2016
Siam Gulf Plant As-Built Laser Scanning	Siam Gulf Petroleum	Benham Engineering	Laser Scanning for purposes of plant As-Built condition capture	Dec,2016	Jan,2017
Siam Gulf Plant As-Built Topograph Survey	Siam Gulf Petroleum	Benham Engineering	Topographic Survey of Siam Gulf Refinery	Feb,2017	March,2017
Modular fabrication Dimensional control	Evonik, Thailand	Hiapseng Engineering	Dimensional Control of pipe rack modules during fabrication.	July,2017	Oct,2017
SPRC RFCCU Plant As-Built	Star Petro Refining	SPRC	Laser Scanning for purposes of plant As-Built condition capture	July,2017	Oct,2017
Gas Regen Plant As-Built Laser Scanning	PTT Gas Separation	Thailand	Experteam Laser Scanning for purposes of plant As-Built condition capture	Aug,2017	Aug,2017
Production Line Calibration	Freyssnet, Thailand	Freyssnet	Dimensional Control Survey to calibrate production line product measurement system	Sept,2017	Sept,2017
ERP Riser Clamp Replacement	PTTEP, Thailand	LS Engineering	Laser Scanning of Erowan Riser Platform for Generation of lifting plan for Riser Clamp replacement project.	Sept,2017	Sept,2017
BEWC Booster Compressor Skid As-Building	Chevron, Thailand	Chevron	Laser Scanning and 3D Modelling for purposes of plant As-Built condition capture	Oct,2017	Oct,2017
Nong Yao WPPA Deck Extension	Mubadala Petroleum	Thai Nippon Steel	Laser Scanning of Nong Yao Alpha Platform for clash check corridor routing of new pipework and structure. Deliver Red Line Markups of new and structure.	Dec,2017	Feb,2018
Production Line Alignment Survey	Freyssnet, Thailand	Freyssnet	Alignment Survey of production line machinery	Dec,2017	Dec,2017

Asia - Brunei

This is only a small sample of work carried out in Brunei since the initial establishment. Brunei total projects since establishment currently stand at 1000 plus.

AMDP06 SWA299 Flowline	BSP, Brunei	PUSB	Laser Scanning & Dimensional Control to Produce Clash Free Design	Jan 2017	Ongoing
BSM Muara Loading Gantry	BSM, Brunei	PUSB	Laser Scanning & Dimensional Control to Produce Clash Free Design	Sep 2016	Oct 2016
IDCX01 & CWDP01	BSP, Brunei	PUSB	Laser Scanning & Development of 3D PDMS Model	Aug 2016	Ongoing

HSE Improvement Activities		
Quarterly Campaigns	Observations	comments on follow-up
I: Office Equipment	Complete	Several chairs removed from circulation and replaced. Staff comments positive.
II: PPE Awareness	Complete	General PPE maintained in good state of repair. Personnel readily request replacements if required. Highlighted lack of record keeping.
III: Incident Reporting	Complete	Low incident reporting indicated, by survey teams, as reflective of low number of incidents occurring. Awareness of reporting requirement was high.
IV: Compliance	Ongoing	This issue has proven hard to progress, due mainly to Client resistance to allowing copies of Toolbox Talks to be made. Ongoing.

Quality Assurance Certificates

MANAGEMENT SYSTEM CERTIFICATE

Certificate No: 8328-2007-AQ-GBR-UKAS	Initial certification date: 22 December 2004	Valid: 22 December 2016 - 15 September 2018
--	---	--

This is to certify that the management system of

N.B. Surveys Ltd
182 Market Street, Aberdeen, AB11 5PQ, United Kingdom

has been found to conform to the Quality Management System standard:

ISO 9001:2008

This certificate is valid for the following scope:

Provision of 3D laser scanning, dimensional control, surveying, engineering design and associated services.

Place and date:
London, 04 May 2017

For the issuing office:
DNV GL Business Assurance UK Limited,
Vivo Building, 30 Stamford Street, SE1
9LQ, London, United Kingdom

R. Redmond
Richard Redmond
Management Representative

Lack of fulfillment of conditions as set out in the Certification Agreement may render this Certificate invalid.
ACCREDITED UNIT: DNV GL Business Assurance UK Limited, Vivo Building, 30 Stamford Street, London, SE1 9LQ, United Kingdom.

Quality Assurance Certificates

EU CERTIFICATE OF CONFORMITY

In accordance with the requirements of the Pressure Equipment Directive 2014/68/EU and the Pressure Equipment (Safety) Regulations 2016, UK Statutory Instrument 2016 No. 1105

This is to certify that the Quality Management System of:

**NB Surveys Limited
Aberdeen
Aberdeenshire
United Kingdom**

has been assessed against the requirements of Annex III, Module H of the Pressure Equipment Directive 2014/68/EU, and Schedule 4, Module H of The Pressure Equipment (Safety) Regulations 2016 and conforms to the requirements for the products shown below:

Design and Manufacture of Pipework in Carbon Steel, Stainless Steel and Duplex Steel

Approval is subject to the continued maintenance of the quality system in accordance with the requirements of the above Directive and Regulations.

Authorisation is hereby given to use the LRV Notified Body Identification Number in accordance with the requirements of the specified Directive and Regulations in relation to the products as identified above.

Certificate No: COV1711397/2
Original Approval: 15 June 2017
Current Certificate: 15 June 2017
Certificate Expiry: 15 September 2018
LRV Notified Body Number 0038
